Rovshen Paltayev

Software Developer & Engineer

Experienced Software Developer & Engineer with strong data structure, algorithm, problem solving skills. Background in business and experience in start-up like environment with ability to achieve goals on a strict deadline. Highly motivated cross-functional team member.

Experience

2016-08 - 2017-01

Software Developer - CS Assistant

North American University

- Engineered and Developed script testing framework for reporting and grading purposes with Java, TestNG, and Extent Reports.
- Developed various front-end animations on web pages using JavaScript.
- Decreased CPU consumption of animations by more than 30% compared to other conventional implementations.

2017-01 - present

Software Engineer

Brighten Technologies LLC

- Start-up like environment with various types of responsibilities mainly residing around development and support in an agile development environment.
- Developed automation scripts to efficiently source target products using Python and increased product sourcing capabilities by at least 5 times..
- Continuously increased performance and speed of the application and ability to overcome certain limitations of scraping scripts by integrating Selenium.
- Provided continuous IT support to existing clients in various technical/non-technical related topics maintaining high satisfaction rate.
- Participated in sales presentations due to ability to translate user needs into easy-to-understand software solutions.

Education

2016-08 - present

North American University - MS Computer Science

Masters in Science of Computer Science Software Engineering - Expecting to graduate in May 2019

Personal Projects

2018-07 - 2018-11

Face Recognition Webapp

- Developed face recognition web application using React.js with HTML/CSS and Javascript
- Developed back-end api using PostgreSQL, Node.js and Express.js
- Increased security for users by using Bcrypt library for storing user sensitive data
- React is one of my recent obsessions, this one is a result of it.
Refer to my portfolio for more details on the project

2018-03 - 2018-04

Robo Friends

- Initial React webapp for testing purposes and was developed for fun
- Implemented search feature with component state change to render in every input
